HUNTERS FOR CONSERVATION
NEW YORK

Get a rebate of up to $60
on the purchase of lead-free ammo

Licensed New York big game hunters can get this rebate for **voluntarily** using lead-free ammunition while hunting.

This program is designed to reduce **unintended** consequences to scavenging wildlife when they consume gut piles left on the landscape.

Purchase lead-free hunting ammo, save the receipt, and apply for up to $60 back (not including taxes and/or shipping.)

Participants will be asked to complete a short survey after the hunting season, before receiving their rebate.

Visit our site for more information about this project and how to get your rebate.

This project supports hunting opportunities and is a privately funded program of Conservation Science Global, in cooperation with NYDEC.
